Re: Annual Report of Hazardous Waste Exports for RY 2013

Dear Mr. Small:

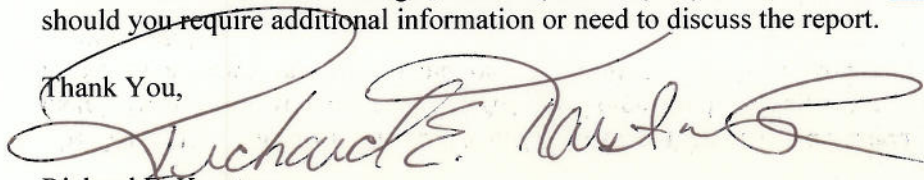

The enclosed Annual Report of Hazardous Waste Exports for Reporting Year 2013 is submitted as required by 40 CFR 262.56. These two reports summarize the type, quantity, and ultimate destination of the "hazardous waste" exported during RY2013.

The "hazardous waste" in this case is kettle dross, malformed or damaged plates, scrap grid metal, Spent Lead Acid batteries (SLABS) and other lead-bearing scrap from the manufacture of lead-acid batteries sent for reclamation at a permitted facility. Please note that under federal regulations, the referenced material would be exempt from classification as a hazardous waste under 40 CFR 261.2(c)(3), as a material being reclaimed.

GNB Industrial Power, Fort Smith, Arkansas did not export any Hazardous Waste or Spent Lead Acid Batteries (SLABS) during RY2013.

Please contact our EHS Manager, David Qualls at (479) 649-2147 or at [david.qualls@exide.com](mailto:david.qualls@exide.com) should you require additional information or need to discuss the report.

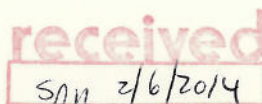

Thank You,

Richard E. Kaestner  
Plant Manager – Exide Fort Smith
